

coco

We are excited to introduce you to Cocono!

Cocono is a new Belgian interior design brand that focuses on slow objects for home decoration. The brand supports and connects young designers. It encourages them to showcase their creativity.

All products are 100% designed and manufactured in Belgium.

Towards zero waste

To protect the planet, we don't wait for solutions, we create them. All our products are one-of-a-kind because they are made from out-of-production yarns. We're taking a circular approach, focused on eliminating waste, by creating products that are better for the planet. Our design team unleashes its creativity to reinvent leftovers into beautiful home decorations. As a result, we cut waste and contribute to a more sustainable future.

On top of that, we are happy to announce that we cooperate with Go Forest. We plant 1 tree for every object sold.

We love taking care of both your home and our planet.
